Backend Developer specializing in RESTful APIs (Python/Flask, Node.js) and database management (MongoDB, MySQL). Experienced in high-throughput data ingestion pipelines, IoT/hardware automation, and real-time data processing, complemented by full-stack frontend capabilities in React and JavaScript.

PROFESSIONAL EXPERIENCE

INTA — Backend Developer

Hurlingham, Buenos Aires | Jul 2025 – Feb 2026

- Data Architecture:** Designed and deployed an end-to-end system for hydrological data ingestion and processing (phreatic levels and water level recorders) utilizing Python and Flask.
- NoSQL Management:** Structured a MongoDB database optimized for high-volume ingestion and fast querying, guaranteeing data integrity for critical hydrological telemetry.
- Hardware & IoT Automation:** Configured Raspberry Pi 4 nodes in Linux environments, creating scheduled automated scripts to poll external data loggers and pipe data into a centralized RESTful API.
- Analytics & Export Tools:** Developed dynamic data visualization dashboards and automated PDF/Excel export modules, significantly reducing technical report turnaround time for institute engineers.
- Real-Time Interface:** Engineered an interactive real-time data table with JavaScript and Jinja2, streamlining live monitoring and filtered data downloads via optimized asynchronous endpoints.

KEY PROJECTS

University Student Academic Tracking & Mentoring System

[View Live Demo](#)

UNAHUR | Final Capstone Project

- Scalable Web Solution:** Engineered a full-stack web application from ground up aimed at streamlining academic guidance and progress tracking for university students.
- Agile Methodologies & Architecture:** Applied Scrum with bi-weekly sprint reviews, managed tasks via Trello, and maintained collaborative Git/GitHub workflows following clean software design principles.
- Integrated Backend & Frontend:** Built a robust backend architecture for business logic and data persistence, seamlessly integrated with an intuitive, fully responsive user interface.

EDUCATION

Universidad Nacional de Hurlingham (UNAHUR)

Bachelor's Degree in Computer Science (*Licenciatura en Informática*)

Hurlingham, Buenos Aires
Mar 2026 – Present

Universidad Nacional de Hurlingham (UNAHUR)

Associate Degree in University Programming (*Tecnicatura Universitaria en Programación*)

Hurlingham, Buenos Aires
Mar 2022 – Dec 2025

TECHNICAL SKILLS

Programming Languages:	Python, JavaScript, TypeScript, Java, HTML5, CSS3
Frameworks & Libraries:	Flask, Node.js, React, Django, Jinja2, Sequelize, Mongoose
Databases:	MongoDB, MySQL
Tools & Technologies:	Git, GitHub, Docker (Basic), Postman, Trello, Raspberry Pi 4, Linux
